**Notes:**

- The reported values for 'quarterly average of monthly observation' are based on April, May and June 2019 month end figures.
- The reported values for 'quarterly average of daily HQLA' are based on business days figures over the 1 April 2019 to 28 June 2019's period.

**Comments:**

As at end of June 2019, the bank's quarterly average LCR stood at 1261% and the main contributors are those associated with the bank's deposit portfolios, offset by inflows from loan repayments and maturities. The bank's HQLA is primarily made up of cash, unrestricted balances with Central Bank and with other banks.

There is a rise over the Total Net Cash Outflow from March 2019 to June 2019 and same reflected in the quarterly average LCR from 1760% to 1261%.

The bank monitors its liquidity position in a dynamic way to meet the prescribed requirement.

The bank did not have any derivative exposure.

The bank continues to monitor its liquidity position in a dynamic way to meet the prescribed requirement.
